

Strata Software Company Profile

Strata Software is a leading provider of requirements definition and management services and solutions. With over 20 years experience in the field we specialise in requirements-driven improvement and optimisation of application lifecycle processes.

Our goal is to enable application development process improvement within our customers. We provide a library of best-practice in requirements definition and management, software specification, test definition, lifecycle tool usage and integration, and project lifecycle processes. Since every customer is different we tailor our best-practice standards to suit your project and tools environment and then provide practical, hands-on support and mentoring to ensure a smooth implementation.

Our Customers

Our customers cover both end-user organisations and the system integrators and solution providers which serve them. Clients include HBOS, Specsavers, Allianz and House of Fraser, and range from household names, through international systems integrators to targeted niche players and span a range of business domains.

Our People

Our staff are experts in their field with extensive project and process experience. A number of our principal consultants are published authors on application development processes and techniques. We have a heritage of standards involvement including the development of the Unified Modelling Language (UML), and we currently sit on the UK board of the International Institute of Business Analysis (IIBA).
